MESSAGE FROM THE CHAIRPERSON

Nepal Engineering Council, as per its Act, is vested with statutory authority for planning, formulation of Norms and standards, monitoring and evaluation and ensuring coordinated and integrated development of Engineering education, engineering profession within the country. Engineering education is thus challenged to prepare a technically competent graduate. Ideally, engineering education programs attempt to lead engineering practice due to their role of preparing future engineers.

We are practicing online registration for the general Registrants. Under the same act the NEC may award the title of Professional Engineer to engineers who have achieved prescribed standards. A Professional engineer is an engineer who has become professionally registered with the Council. Till date, 61 Engineers have been registered with the Council in Professional Engineer category.

I am very happy and excited to share with you all that, the rapid construction of NEC's own building is taking place within the premises of Heavy Equipment Division, Department of Roads at New Baneshwor. And we all are eagerly waiting for approval for amendment of NEC Act, with provision of licensing examination included, by the lower House of Parliament.

Er.Dilli Raman Niraula, PEng (Nepal)
NEC Reg. No. 2639 (Civil)
Chairperson

MESSAGE FROM REGISTRAR

Nepal Engineering Council has stepped into 22nd year of its establishment, and I feel a sense of great pride, responsibility and accountability for being at the helm of such a prestigious organization.

Engineering, much like other science, is a broad discipline with further roots into several sub-disciplines. These disciplines incorporate different areas of engineering works. Although initially an engineer will usually be trained in a specific discipline, throughout an engineer's career, the engineer may become multi-disciplined, having worked in several of the outlined areas.

Developments in communications, travel and trade over decades have produced a global network of ideas, institutions and economies. Engineering practice and its related technologies have become global in scope and scale. To be effective, today's engineering graduate must not only be grounded in scientific and mathematical fundamentals, engineering principals and design but must also have a global outlook and the broader skills to work in society in both home country and internationally. Engineering education is thus challenged to prepare a technically competent graduate. Ideally, engineering education programs attempt to lead engineering practice due to their role of preparing future engineers.

We are in continuous process to foster co-ordination with similar institutions in other countries and engineering universities, institutions and colleges in Nepal and in other countries, for mutual benefits in furthering the objects of the Organization. The key issues and challenges that Nepal Engineering Council is facing are international exposure, identification and establishment of international stakeholders.

Introduction:

Nepal entered into a modern phase of development process after the political change in the sixties. Engineering activities began to contribute to the development of the country and the engineering profession started to gain importance in the society. The engineering manpower began to grow in number and was involved in all spheres of national development. Furthermore, the introduction of democracy in 1990 encouraged the growth of establishment of engineering colleges in Nepal and the enrollment of students into these engineering colleges started growing very fast. At present it is expected that nearly 3500 engineers would be graduating from local engineering colleges every year. To make the engineering profession more effective, Nepal Engineering Council was established under the Nepal Engineering Council Act, 2055 . As per the Act, NEC has been vested with the statutory authority for the planning, coordinated development and monitoring of engineering profession and education in the country. NEC Act 2055 gives an outline on the formation of the Council, the tenure and the roles and responsibilities of the Chairperson, Vice Chairperson and the Registrar.

Nepal Engineering Council Rules, 2057 has also been prepared and approved by the Government as per the provision of Clause 37 of the Act. It defines the registration of engineers into three following categories .

- a) General Registered Engineer**
- b) Professional Engineer**
- c) Non-Nepali Registered Engineer.**

NEC Rules 2057 also lay down the Professional Code of Conduct for engineers registered with the Council .

As of Ahwin, 2078, 64620 Engineers have been registered with NEC. NEC has started registration of professional Engineer (PEng) Nepal. It has registered 61 P.Engg. till to date.

Total of 50 Engineering colleges have been approved by the Council to run various faculties of engineering with different intake capacities.

Objective

The objective of Nepal Engineering Council is to make the engineering profession effective by mobilizing its resources in a more systematic and scientific manner. The Engineers practicing in Nepal are required to register in Council as per its Act. The duties and responsibilities of the Council are

- To prepare policies, plans and programs for the smooth functioning of the engineering profession and to execute them.
- To set norms and standards for engineering education in Nepal .

- To grant permission and approval to carry out engineering education to those engineering colleges and institutions that meet the required norms and standards and to recognize their degrees and certificates.
- To monitor and inspect the quality of engineering education provided by the engineering colleges and institutions.
- To fix the necessary qualification in order to practice engineering profession and to register them in the Council.
- To cancel the registration of the engineer if found to violate the Code of Ethics.

NEPAL ENGINEERING COUNCIL

In conformity with Nepal Engineering Act 1998, Nepali and Non-Nepali Engineers working with Government, Diplomatic Mission, semi Government, Private Sectors, NGO's, Bilateral and Multilateral Agencies, Research and Academic Institutions, Consultants Contractors etc, are required to get registered in the Council and obliged to abide by its Professional Code of Conduct. Any formal document such as design, map, specifications and estimates etc, relating to the engineering profession, must be endorsed by a Registered engineer. The Name, Designation and N.E. council Registration Number must be clearly notified under the signature. Executing Engineering work without the endorsement by a Registered Engineer is an offence against the law of the Land and the Council can prosecute offenders.

Furthermore, organization/bodies employing persons that deem to be Practicing Engineers (irrespective whether Nepali or Non-Nepali) are required to get these persons registered with the council. Failing to register is a violation of the Law of Land.

Engineers Violating this requirement can be liable to a punishment with a fine of an amount up to three thousand rupees or with an imprisonment of a duration of up to three months or both as per Chapter-7, Section 30, Sub-Section 2 of N.E. Council Act 1998.
